	Error	<p>The application issued a set of MPI calls that can cause a deadlock! A graphical representation of this situation is available in a <a href="#">detailed deadlock view (MUST Output-files/MUST_Deadlock.html)</a>. References 1-4 list the involved calls (limited to the first 5 calls, further calls may be involved). The application still runs, if the deadlock manifested (e.g. caused a hang on this MPI implementation) you can attach to the involved ranks with a debugger or abort the application (if necessary).</p>		<p>reference 1 rank 0:  <b>MPI_Send</b> called from:  #0 main@example.c:39</p> <p>reference 2 rank 1:  <b>MPI_Send</b> called from:  #0 main@example.c:39</p> <p>reference 3 rank 2:  <b>MPI_Send</b> called from:  #0 main@example.c:39</p> <p>reference 4 rank 3:  <b>MPI_Send</b> called from:  #0 main@example.c:39</p>
